THE ART OF LIVING SLOW

MUUBS / We create uniqueness through irregularities, and pay tribute to the beauty that lies in imperfection.

Guided by an uncompromising approach to quality, uniqueness and honest materials, the SS20 collection features subdued organic shapes and surfaces that embrace nature. Our work is based on contrasts - between simplicity and complexity, light and darkness, roughness and softness. Each product is shaped and nurtured with a deep devotion to a sense of rootedness, and a passionate belief in natural materials and shapes as a true source of life enrichment.

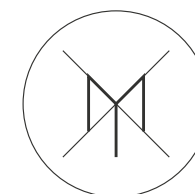

Inspired by imagination, we have created a collection, in which we celebrate the beauty that lies in imperfection and the authenticity and harmonious imbalance this lends to our interior.

The SS20 collection is designed to last. Surpassing trends and current movements, the products enter the sphere of timeless design, useful solutions and a humble and unpretentious approach to the importance of nature - both now and in the future.

We are rooted in the Scandinavian design tradition, characterised by enduring aesthetics, functionality, great craftsmanship and honest expression.

Enjoy!

RAW STORAGE

Organising spaces and creating neat, striking storage solutions requires refinement in design and attention to the simplest, but essential details. Rawness is not something we add - it is embedded. It relies on the choice of materials and a knowledge of texture, and in contrasts between the modest shape and the rough expression.

L: Hazel - Bonbonniere, P. 112 /
R: Hazel - Serving bowls, P. 112

OAKS REDEFINES STORAGE

The Oaks modular wall unit system redefines the traditional shelving system and offers a myriad of combinations - from the rigorous to the more asymmetric expression. As the shelves are removable, you can redesign the look and renew its uniqueness

P. 70/71: Oaks

1 x Mounting bar S, Natural oil
1 x Mounting bar M, Smoked
1 x Mounting bar L, Smoked
1 x Mounting bar L, Natural oil

BLOCKS BUILD YOUR STORAGE

The multiple options of the Blocks bookcase provide countless flexible storage solutions. Use it as a wall or floor unit or stack a few. It is stunning either as a single unit or combined with others in an orderly or asymmetric form. The unique details surrounding the overlapping joints make it possible to assemble the different bookcases in new and interesting forms with a light expression. The Block bookcase is designed in collaboration with the Danish design team Steffensen & Würtz.

P R O D U C T S

YOU DESERVE THE FREEDOM TO CHOOSE

If you are looking for a unique piece of furniture, our factory in Herning, Denmark can provide a custom-made solution, just for you. The Mano table is a customised and unique dining table with a remarkable durability and strength. The organic shape follows the natural growth of the tree, making each table unique.

Any natural cracks are blocked with wooden butterflies, which is an old technique that retains the cracks, preventing them from growing.

The matt lacquer, which every table top is treated with three times, highlights the beautiful grain of the tree and makes it easy to maintain. The table ranges from 220-720 cm.

The table is made from certified suar wood, which is especially suitable for table tops due

to the durability and hardness of the material, easy maintenance, and resistance to stains. Suar is a wood with exceptionally beautiful colours and a unique grain pattern with characteristic, expressive contours. For this reason, most suar wood products are left with their natural colour.

We believe that long lasting, high quality furniture with aesthetical value will increase the lifespan of products, thereby working against the 'throw-away culture' that has emerged in recent decades. To us products which a long lifetime are essential in our efforts towards a more sustainable society.

CUSTOM MADE

NOTE: THE TABLE IS MADE OF A SINGLE PIECE OF WOOD, SO THE SURFACE OF THE TOP CAN CHANGE, DEPENDING ON HUMIDITY AND HEAT. FURTHERMORE, EACH TABLE-TOP IS UNIQUE, SO YOU HAVE TO ACCEPT ANY DEVIATIONS FROM THE INDICATED DIMENSIONS.
